Profile

Computer Science undergraduate specializing in Cybersecurity with experience building web applications, backend services, and developer tools. Skilled in Python, JavaScript, React, Express, FastAPI, PostgreSQL, REST APIs, and AI integration.

Work Experience

Astreus Next Gen Pvt. Ltd.

Remote

Cybersecurity & ML Intern

- Developed secure Python and FastAPI services with authentication and authorization controls.
- Enhanced the Panopticon SOC platform using FastAPI and PostgreSQL.
- Automated security workflows and integrated security assessment utilities.

GirlScript Summer of Code

Remote

Open Source Contributor

- Built secure API integrations and implemented validation mechanisms for AI-powered legal assistance workflows.

Palo Alto Networks – AICTE Virtual Internship

Remote

Cloud Security Intern

- Monitored cloud security posture and compliance using Prisma Cloud.
- Investigated security findings and remediated risks by applying cloud security best practices.

Projects

Token Meter | Chrome Extension

GitHub

Manifest V3, JavaScript

- Built a Chrome extension for ChatGPT, Claude, and Gemini to estimate token usage and track context limits.
- Added prompt analysis and optional rewriting features, with separate tokenizers loaded for each platform.

Semantic Log Detector | Intrusion Detection System

GitHub

Python, LightGBM, Sentence-BERT, FastAPI

- Built a hybrid intrusion detection system using LightGBM, Sentence-BERT, Isolation Forest, and rule-based detection.
- Developed an async FastAPI service for real-time log ingestion and threat detection.
- Implemented drift monitoring, adaptive thresholding, and MITRE ATT&CK mapping for structured security alerts.

NetSage ML | Machine Learning Intrusion Detection System

GitHub

Python, FastAPI, React, Apache Kafka, MongoDB

- Built an intrusion detection system to identify network attacks from real-time packet data.
- Used Apache Kafka and MongoDB to process and store network traffic data.
- Developed a FastAPI backend and React dashboard to display attack predictions and network anomalies.

Skills

Languages: Python, Java, TypeScript, JavaScript

Frontend: React, Tailwind CSS

Backend: Express, FastAPI, REST APIs

Databases: PostgreSQL, MongoDB, Prisma

Tools: Docker, Git, Chrome Extension APIs, OAuth 2.0, JWT

AI & Data: LLM Integration, Prompt Engineering, LangChain, Vector Databases (FAISS, ChromaDB)

Operating Systems: Kali Linux, Ubuntu, Arch Linux

Education

Sreenidhi Institute of Science and Technology

B.Tech in Computer Science & Engineering (Cyber Security)

Graduation: August 2026

CGPA: 7.65
